

KBM Resources Group - Case Study

NimonikApp EHS Updates

Nimonik enables KBM Resources to provide streamlined services to Saskatchewan forestry companies.

“Nimonik helps us deliver easy-to-understand environmental updates to our clients.” – Diane Roddy, KBM Resources.

.....

Diane Roddy
Saskatchewan Manager
KBM Resources, Canada

Diane manages KBM’s environmental consulting and technical services, which range from aerial surveys and GIS technology to reforestation and field surveys.

The Challenge

KBM Resources Group is an independently-owned natural resources consulting firm based in Northern Ontario. In 2011, KBM opened an office in Prince Albert, with Diane as the branch manager, to better serve their Saskatchewan clients.

An association of Saskatchewan forestry companies approached Diane with a request for ISO 14001 and SFM standards legal compliance updates. The companies ran their own woodlands operations and needed to understand and monitor federal and provincial requirements.

Diane launched an investigation to find a legislation monitoring service that could provide a cost-effective group subscription.

The Search

- KBM Resources searched for a group subscription because “at that time, the forestry industry was in a severe downturn” and they wanted a cost-effective solution.
- Diane found [Nimonik](#) through a simple web search.

💡 The Solution

- Diane and her team were impressed by Nimonik's "easy-to-use free trial subscription."
- She also found Nimonik to be flexible and very willing to provide the group subscription that was an essential need.
- Nimonik clearly had the best fit for KBM's needs. As Diane says, "We checked into what was available and started a group subscription with Nimonik."

✂ The Implementation

- Diane was in charge of implementing Nimonik's compliance management system at KBM. She identified the relevant forestry legislation for her clients and created their profiles on the Nimonik site.
- When Diane had questions about the implementation process, she found that Nimonik's team was "quick to respond" and "always able to help."
- KBM's clients easily adopted the new technology. As Diane explains, "companies that are part of the subscription are happy, as auditors feel that this method of tracking legal updates satisfies the certification requirements they have to meet."
- KBM's clients were also happy to discover that their EHS updates are easy to read. The accessible language used in the updates help the companies clarify their environmental compliance requirements.

✓ The Results

- In 2012, KBM Resources brought their Saskatchewan forestry clients onto the Nimonik's compliance management App platform. Since then, they have added more clients and have received high marks on the quality of their service, thanks in part to Nimonik.
- Diane reports that Nimonik's "tracking of legislation changes" has helped KBM deliver a high-quality service to their clients, who can now more effectively "meet their certification obligations."
- KBM Resources is a proud affiliate partner of Nimonik. [Learn how your consulting firm can become a Nimonik affiliate.](#)
