

# 100 ENV - Case Study

## NimonikApp Audit and EHS Updates

Nimonik's EHS legal compliance and mobile auditing solution helps 100 ENV demonstrate EHS legal compliance to R2, ISO 14001: 2015 and RQP certification bodies.

---

“Nimonik tracks all applicable legislation for me and maintains a complete record of reviews & audits” – Sharon Tansky, 100 ENV

.....

**Sharon Tansky**  
EHS Coordinator at 100 ENV.

**Sharon must ensure that 100 ENV is constantly in compliance with applicable regulation**

---

### The Challenge

100 ENV prevents the burial of electronic and plastic waste through recycling and responsible disposal.

100 ENV aims to comply to the changing regulations and maintain its certification to R2, ISO 14001: 2015, and RQP.

To receive electronic material for recycling, most suppliers require certification to one of the major standards. These standards include a provision to have an EHS compliance program with evidence of regular reviews of applicable legislation.

**This task is time-consuming and challenging.**

## The Search

- To ensure thorough EHS compliance, 100 ENV wanted a well-integrated solution with both software and regulatory content to ensure no gaps in compliance. Ease of use and low maintenance were also key factors in their decision. The goal was to allow 100 ENV staff to focus on their core business and not on legal compliance.

## The Solution

- 100 ENV found Nimonik by searching online.
- They then created a 20-day Free Trial to try the software, which they found easy to use.
- Working with Nimonik, 100 ENV developed an implementation plan that ensures they stay ahead of the regulatory changes and in compliance.
- In addition to legal compliance solutions, 100 ENV used Nimonik's auditing tool to carry out audits 80% faster and organize their audit evidence.

## The Implementation

- Using Nimonik's interface, 100 ENV searched through the EHS documents that might apply to them and indicated which applied. They then used the regular EHS updates to understand and identify important changes that applied to them. When in need, Nimonik's team of EHS experts explained updates, conducted training and ensured 100 ENV had everything they needed to stay compliant.

## The Results

- 100 ENV has maintained their ISO 14001, RQP and R2 certifications despite a busy workload and changing requirements in the jurisdictions they operate in. They passed their latest management system audit with flying colours!
